1) Write two different queries that would produce all orders taken on October 3rd or 4th, 1990.

   SELECT * FROM Orders WHERE odate = '1990-10-03' or '1990-10-04';

2) Write a query that selects all of the customers serviced by Peel or Motika.
   (Hint: the snum field relates the two tables to one another).

   SELECT * FROM Customers
   WHERE snum IN (SELECT snum FROM Salespeople
   WHERE sname IN ('Peel', 'Motika')
   );

3) Write a query that will produce all the customers whose names begin with a letter from 'A' to 'G'.

   SELECT * FROM Customers WHERE sname BETWEEN 'A' and 'G';

4) Write a query that selects all customers whose names begin with the letter 'C'.

   SELECT * FROM Customers WHERE sname LIKE 'C%';

5) Write a query that selects all orders except those with zeroes or NULLs in the amt field.

   SELECT * FROM Orders WHERE amt Is Not NULL and < >0;
